FCC

RE: 04-233 Proceeding

I am a listener of a radio station that is currently being heard on a FM translator service. I was deeply concerned to learn that the FCC is considering allowing LPFM stations to take priority over current the FM translator service. I am not in favor of this change.

As a resident of the local community, the station that I listen to (K-LOVE) is the only station that carries this type of programming. I know of many people who enjoy listening to this station and if K-Love lost their priority there are no other options in my listening area. This would be a great loss to our community as they communicate important activities that are taking place in our area as well as the music and messages that they share.

K-Love fills a niche that is not available in our area by any other radio station and in this way is providing a service in the public interest since there is a large population of listeners of this station.

I hope that the FCC will reconsider this action and make the right decision to not have the LPFM stations take priority over those heard on FM translator service.

Thank you for your time and attention.
